

SER 321 A Session

SI Session

Sunday, February 23rd 2025

7:00 pm - 8:00 pm MST

Agenda

Distributed Properties Review

Consensus

Types and Algorithms

RAFT Example

Peer to Peer Communication

Assignment 5 Example Tracing

SI Session Expectations

Thanks for coming to the **SER 321** SI session. We have a packed agenda and we are going to try to get through as many of our planned example problems as possible. This session will be recorded and shared with others.

- If after this you want to see additional examples, please visit the drop-in tutoring center.
- We will post the link in the chat now and at the end of the session.
 - tutoring.asu.edu
- Please keep in mind we are recording this session and it will be made available for you to review 24-48 hours after this session concludes.
- Finally, please be respectful to each other during the session.

Interact with us:

Zoom Features

Zoom Chat

- Use the chat feature to interact with the presenter and respond to presenter's questions.
- Annotations are encouraged

Connections - Review!

Connections

SER 321

Distributed Systems

Remember that we are operating in *reality*

- No global clock
- Nodes *will* fail
- Web of nodes *will constantly* change
- Network is not *always* reliable
- Latency is *always present*
- The path traversed *changes*
- Some resources *must be shared*
- You need to prevent the pitfalls!
 - No deadlocks
 - No starvation
 - No error states

Word Scramble
or
Raw Recall?

SER 321

Consensus

“General agreement or trust amongst a group”

Types of Consensus?

Leader Election

Who's in charge or keeping the beat

Result Verification

Check your work with a neighbor

Log Replication

Verify and maintain my copy of the data

Node Validation

Do I want to let you into my network

SER 321

Consensus

Match the Consensus Algorithm to its Description!

2-Phase Commit

Blockchain

Proof of Work

RAFT

If you solve this
resource-intensive problem, you
may make a request

Leader Election and Log
Replication coordinate
transactions

Transaction Coordinator
approves and orchestrates
transactions

Distributed Ledger used to
determine if a transaction is valid

SER 321

Consensus

Match the Consensus Algorithm to its Description!

SER 321

RAFT

RAFT is a
great
consensus
example!

Leader Election

Log Replication

The Secret Lives of Data is a different visualization of Raft. It's more guided and less interactive, so it may be a gentler starting point.

SER 321

Communication

What about *adding* a Peer to the Cluster?

SER 321

Communication

What about **adding** a Peer to the Cluster?

Assuming we want to allow the peer to join...

Is that all?

SER 321

Communication

What about **adding** a Peer to the Cluster?

Assuming we want to allow the peer to join...

Three Additional Steps:

- 1.
- 2.
- 3.

SER 321

Communication

Remember that the OS allocates a new port for the client socket!

Run With:

```
gradle runPeer --args "Name Port"
```

We are going to take a closer look at the code in a moment!

```
gradle runPeer --args "Peer8000 8000"
```

SER 321

Communication

```
gradle runPeer --args "Peer7000 7000"
```

```
> Task :runPeer
Hello Peer7000 and welcome! Your port will be 7000
> Who do you want to listen to? Enter host:port
<=====--> 75% EXECUTING [21s]
> :runPeer
█
```

```
> Task :runPeer
Hello Peer8000 and welcome! Your port will be 8000
> Who do you want to listen to? Enter host:port
<=====--> 75% EXECUTING [21s]
> :runPeer
█
```

```
gradle runPeer --args "Peer8000 8000"
```

SER 321

Communication

```
gradle runPeer --args "Peer7000 7000"
```

```
> Task :runPeer
```

```
Hello Peer7000 and welcome! Your port will be 7000
```

```
> Who do you want to listen to? Enter host:port
```

```
<=====--> 75% EXECUTING [21s]
```

```
> :runPeer
```

```
> Task :runPeer
```

```
Hello Peer8000 and welcome! Your port will be 8000
```

```
> Who do you want to listen to? Enter host:port
```

```
<<==<=<=<=<=<=====----> 75% EXECUTING [1m 56s]
```

```
> You can now start chatting (exit to exit)
```

```
<=====--> 75% EXECUTING [2m 3s]
```

```
> :runPeer
```

SER 321 Communication

What will
happen?

```
> Task :runPeer
Hello Peer7000 and welcome! Your port will be 7000
> Who do you want to listen to? Enter host:port
<===== > 75% EXECUTING [21s]
> :runPeer
█
```

```
> Task :runPeer
Hello Peer8000 and welcome! Your port will be 8000
> Who do you want to listen to? Enter host:port
<===== > 75% EXECUTING [1m 56s]
> You can now start chatting (exit to exit)
<===== > 75% EXECUTING [3m 33s]
<===== > 75% EXECUTING [3m 37s]
hi 7000
```

```
PS C:\ASU\SER321\examples_repo\ser321examples\Sockets\S
Starting a Gradle Daemon, 1 busy and 1 stopped Daemons
```

```
> Task :runPeer
Hello Peer7000 and welcome! Your port will be 7000
> Who do you want to listen to? Enter host:port
<===== > 75% EXECUTING [2m 48s]
> :runPeer
█
```

Why?

9000

P

8000

P

```
> Task :runPeer
Hello Peer8000 and welcome! Your port will be 8000
> Who do you want to listen to? Enter host:port
<===== > 75% EXECUTING [1m 56s]
> You can now start chatting (exit to exit)
<===== > 75% EXECUTING [3m 13s]
> :runPeer
hi 7000
```

Communication

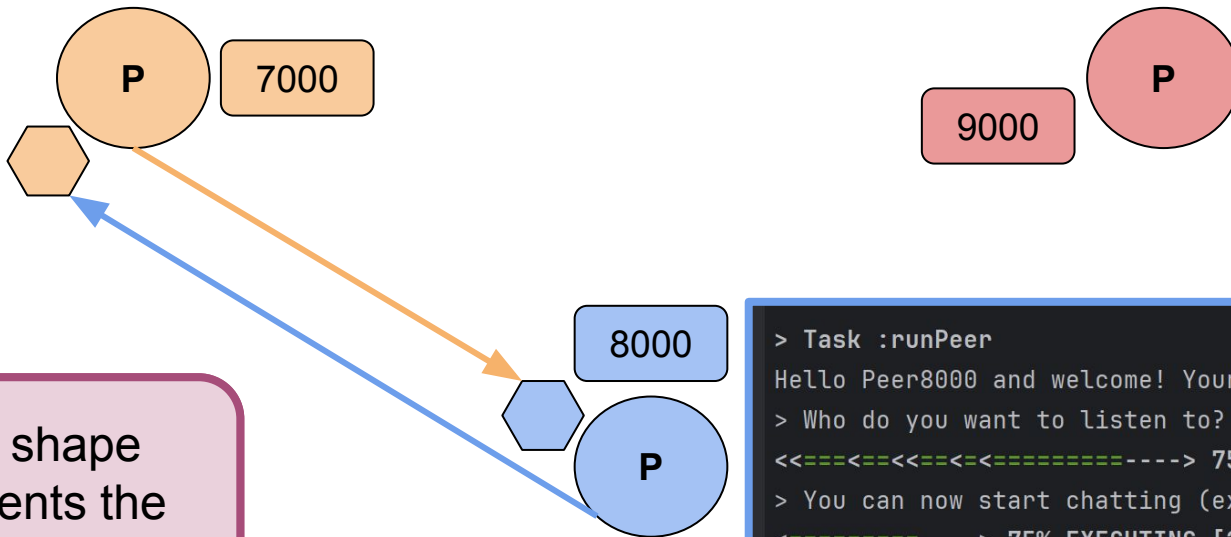

Diagram illustrating a node 'P' with a value of 7000. A blue arrow points from the node to a small orange hexagon.

```
> :runPeer
```

```
> Task :runPeer  
Hello Peer7000 and welcome! Your port will be 7000  
> Who do you want to listen to? Enter host:port  
<<====<=<==<=====-----> 75% EXECUTING [3m 43s]  
> You can now start chatting (exit to exit)  
<<<=<==<=<==<=====-----> 75% EXECUTING [3m 58s]  
<=====-----> 75% EXECUTING [4m 1s]  
Hi Peer8000!
```

Communication

localhost:8000

What shape represents the **ClientThread**?

```
> :runPeer
```

Assignment 5 Visualization

Let's depict the Example...

Sum: 120
Time : 700 ms

Time comparison
depends on your
implementation!

[1, 2, 3, 4, 5, 6, 7, 8, 9,
10, 11, 12, 13, 14, 15]

Delay: 50ms

Sum = 15 + 40 + 65 = 120 ✓

Time = ⌈ 200, 200, 200 ⌉ = 200

Sum:15 Time:200

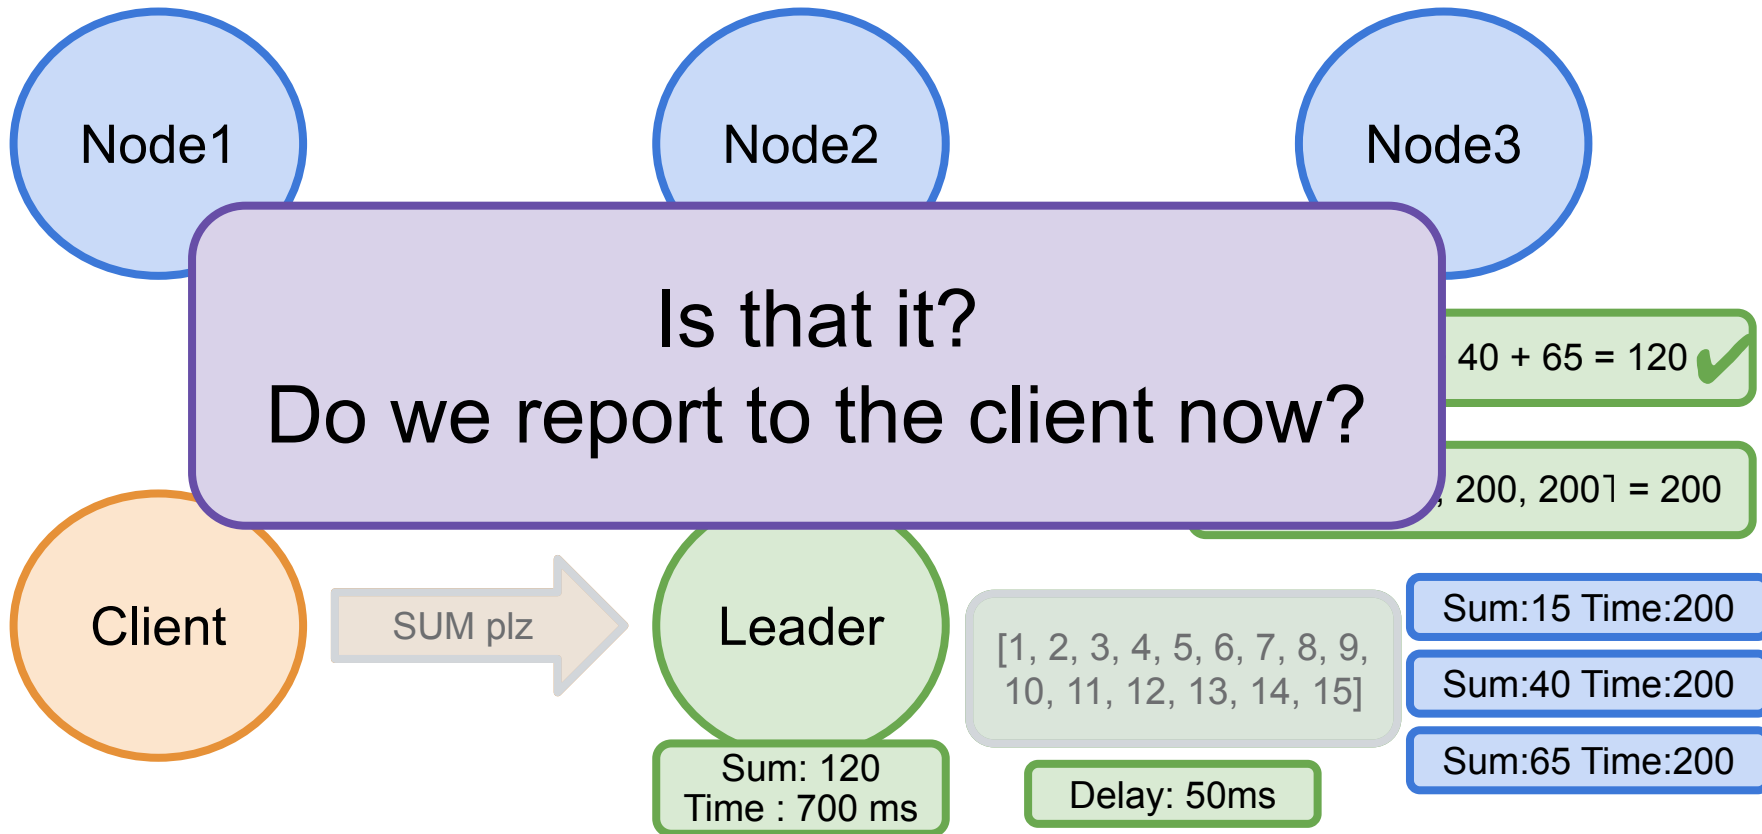

Sum:40 Time:200

Sum:65 Time:200

Academic Support

Academic Support Network (ASN) provides a variety of free services in-person and online to help currently enrolled ASU students succeed academically.

Services

Subject Area Tutoring

Need in-person or online help with math, science, business, or engineering courses? Just hop into our Zoom room or drop into a center for small group tutoring. We'll take it from there.

[Need help using Zoom?](#)

[View the tutoring schedule](#)

[View digital resources](#)

Go to Zoom

Writing Tutoring

Need help with undergraduate or graduate writing assignments? Schedule an in-person or online appointment, access your appointment link, or wait in our drop-in queue.

[Access your appointment link](#)

 **Academic Support Network**

Services Faculty and Staff Resources About Us

University College

Online Study Hub

Online peer communities for students and tutors, YouTube channels, and Tutorbots.

What are online peer communities?

Individual courses have an online peer community that allows you to connect with your peers to post and answer questions and to develop study groups.

How can tutoring center videos help?

Videos can help supplement the learning you're doing in and outside of class and include step-by-step methods for how to understand concepts.

How does the Tutorbot work?

You can ask the Tutorbot questions about course concepts and the Tutorbot will recommend additional resources and examples to help address your questions.
